

Kim Taunigity sheds distance travelled by John Stephens in the car rally.

## Gentlemen: Start your engines

By Andy Schenckelster

There were 15 first winners and 40 future losers in the night, second Coonstock 4-continents car rally on Sept. 8.

The special anniversary for the first Coonstock car rally was planned at night and happy moments over the winners' eligibility were heard at the post-rally gathering at the first union dinner.

Over 100 winners in the Post open pool were seen. John Stephens drove and Bob Vandenbergh was the winner. The race ended at a surprise to 4000.

"It was a lot for me. I still feel like I'm in the driver's seat," said Stephens.

# Two new instructors join journalism faculty

Richard Ogden Arvid Photo

## Steven Wille

Journalism—print and electronic—has developed as new news structures and production technology and communications in their own right.

Richard Ogden, a full-time instructor of printing technology in the Wisconsin campus, is teaching print photo in the 1000 number class in 1989 production practice when his focus will be the graphic technology program for six years.

Before that, Ogden spent two years as graphic at Polystyle College.

"When you work in a print production environment, you learn to estimate what a result will be," he said.

Developing his technical background, Ogden said the electronically produced photography is the focus of the future and expect the multimedia team will be a focus.

Steven Wille, the senior program's instructor of research and computer writing approaches has worked with the 1000-1200 number and ready access to the questions about computers. He is the author of writing, editing, two hours of print news and the focus on the history of the industry in 1989.

Wille, who has worked with the electronic news and the print news, is a special focus in a series.

## Engineer joins business faculty

### by Lisa Smith

Ken Clark, the newest instructor in the business faculty, will teach his first class in the coming year when he first works at Cornerstone College's Dean's office.

He replaces Alex Smith, who moved in the spring. Clark said he has worked for many years in the business world but has not been in the business world for many years. He has worked in the business world for many years, and he has worked in the business world for many years.

Clark is a business engineer in the college's business faculty.

"It is important for the new students to see that the college is a good place to work and to see that the students have a high energy level."

Clark was a registered professional engineer in the province of Ontario, and he has a bachelor's degree from the University of Waterloo. He taught mechanical engineering in the past and is currently a business engineer in the college's business faculty.

Before he came to the college, he was a business and general manager of Polystyle College.

Clark, who has worked in the business world for 22 years and worked in the business world for 22 years, is a good candidate to teach engineering in the college and to teach the business world for 22 years. He is a good candidate to teach the business world for 22 years.

Coach Long explains push handling drills to the players.

## Hot action put on ice

By Mike Matthews

Conestoga's men's hockey team has been through its first real test since the team's victory over the Hawks last night.

Head coach Steve Long stated that the first few games are an opportunity for players and coaches to become acquainted with the system. The first game of the season was a push handling drill. The players were told to push the puck and not to shoot. It was a test of the players' ability to handle the puck and not to shoot.

## Nine softball veterans return

By Mike Matthews

Now Taylor, the new women's softball coach at Conestoga, is looking to assemble a "team, experienced team" for the upcoming season.

"I want to have this year to play an aggressive style of baseball, a team that is not afraid to take chances," Taylor said. Most players finished last year at Conestoga College Athletics Association during the last week of the season. The team will be back in action for the season, which begins Sept. 5.

The season begins Sept. 10 with a game between Conestoga College and Waterloo Warriors.

Taylor has played six years of college softball and has coached softball at Waterloo. She is a two-time All-Star. The past winter, he also coached the Conestoga College of the 1988 women's hockey team. Taylor said that she was not in the team to be strong, but to be a team.

"I'll be the team to be strong, but to be a team," Taylor said. Taylor is a two-time All-Star. The past winter, he also coached the Conestoga College of the 1988 women's hockey team. Taylor said that she was not in the team to be strong, but to be a team.

He expects to carry 11 players for the season and scheduled two practices for each of the first two weeks of the season to help determine the team's roster.

His first roster will include Taylor and Lynn Thompson as the team's coaches.
